

Army Training Information Architecture

UNITED CONSULTING PARTNERS
BROKERS

Overview:

G3 developed the US Army Training Information Architecture (ATIA) and the Soldier Portal to serve the needs of over 400,000 active duty military personnel in over 100 countries around the world.

Features:

- Dynamic user interface is self-configuring to task.
- Supports secure and non-secure apertures with content filtering.
- Content is based on job type, skill level, duty assignment and location.
- Prioritization of training sequence is based on immediate progress.
- Integration with Career Map shows overall long-term progress.
- Alert and notifications are prioritized based on urgency.

Benefits:

- Individual Training Configuration (ITC) for individual tasks.
- Unit Training Management Configuration (UTMC) for collective tasks.
- Training Management Configuration (TMC) for curriculum management.
- Learning Management Configuration (LMC) for course management.

Industry:

Government
